

Process Engineer

Ahlstrom Chirnside Ltd based within the Scottish Borders is a subsidiary of the Ahlstrom Corporation and is internationally recognised as a market leader in the design, process manufacture and marketing of nonwoven materials.

As part of our continuous improvement process the UK Operations require support on optimising the processes we currently use. We have identified a resource requirement within our Process department to help achieve this goal.

The Process Engineer position will work as part of a small team to develop new processes and enhance existing systems to optimum performance.

Duties include:

- Ensuring effective operation of Health & Safety and Environmental programmes.
- Maintaining and operating systems to monitor and control performance.
- Establishing satisfactory manufacturing standards and to be involved in continuous improvement projects at all levels.
- To independently manage improvement projects and to liaise across all departments in order to implement these improvements.
- Identify process areas that can be improved or developed to aid the production process.
- To have a hands on approach in implementing projects.

Skills

- Educated to minimum Degree level in Engineering/Science or Chemistry.
- Minimum 5 years' experience of a Continuous Process Industry.
- Knowledge of nonwoven or paper industries would be an advantage .

If you feel you have the drive and skills needed for this position please contact: Martin Tennant, Human Resources Manager UK, either by e-mail: martin.tennant@ahlstrom.com or phone +44(0) 1890 819354 for more details

Closing date for applications is
Monday 21st November 2011
